September 9, 2020

I examined the following mares for Weaver Quarter Horses on September 5, 2020. Mares were confirmed pregnant by ultrasound and rectal palpation. Approximate gestation lengths are given below. Mares were pasture exposed from May 15 to August 5, 2020.

LOT #	Name	Pregnancy Status	Days Gestation	Approx. Due Date	Stud
16	Busy Heiden Chex	Pregnant	~80	5/25/21	Perkster
28	SNW Broke In Heaven	Open			
37	Heavenly Lena Rose	Pregnant	~90	5/15/21	Perkster
45	SNW Smart In Heaven	Pregnant	~80	5/25/21	Perkster
65	A Smart Busy Lena	Pregnant	~100	5/4/21	Perkster

Foaling dates in mares are variable with gestations of 320 days to 360 days all producing normal foals. Expected foaling dates based on a 340 day gestation:

135+	3/10 to 4/21		
110+	4/5 to 5/15	100+	4/15 to 5/25
90+	4/25 to 6/5	80+	5/5 to 6/14
75+	5/10 to 6/19	50+	6/5 to 7/15

Respectfully,

Robert C. Schmitt, D.V.M.
